1. PLAYBOOK TO INSTALL TOOL

```yaml
---
- hosts: dev
  connection: ssh

  tasks:
    - name: install git
      yum: name=git state=present
```

2. PLAYBOOK TO INSTALL MUTIPLE TOOLS

```yaml
---
- hosts: all
  connection: ssh

  tasks:
    - name: install git
      yum: name=git state=present

    - name: install maven
      yum: name=maven state=present
```

3. PLAYBOOK TO INSTALL TOOLS USING VARIABLES

```yaml
---
- hosts: all
  connection: ssh

  vars:
    - abc: git
    - xyz: maven

  tasks:
    - name: install git
      yum: name={{abc}} state=present

    - name: install maven
      yum: name={{xyz}} state=present
```

4. PLAYBOOK TO INSTALL TOOLS USING DYNMAIC VARIABLES

command: **ansible-playbook filename --extra-vars="abc=git state=present"**

```yaml
---
- hosts: all
  connection: ssh

  tasks:
    - name: install git
      yum: name={{abc}} state=present

    - name: install maven
      yum: name={{xyz}} state=present
```

5. PLAYBOOK TO CREATE A FILE

```yaml
---
- hosts: all
  connection: ssh

  tasks:
    - name: create a file
      file:
        path: "/root/myfile.txt"
        state: touch
```
